

INTRODUCTION

This parts catalogue is divided into nine main sections numbered 1 to 9. Each main section is again divided into sub-sections numbered 1.1, 1.2, 1.3 etc. In certain instances, a further breakdown of the sub-section is required and the numbers are 1.4A, 1.4B etc.

On each of the left hand pages of the catalogue is an exploded drawing showing the items which together make up the assembly or system covered by the sub-section. Each item is identified by an illustration number.

The right hand pages list the replacement parts by illustration number, part number and description, together with any qualifying remarks.

Each list of parts and the associated exploded drawing covers variations of the Lagonda model, but if the variation for a particular system or component is sufficiently different to warrant a separate illustration, it will be contained within its own sub-section.

At the top of each page are the identification details, i.e. sub-section number, main section title and sub-section title.

At the bottom of each page are the page number, the publication number, the date of compilation and the print quantity.

HOW TO USE THE CATALOGUE

To find the part number of a particular component :

1. Establish the sub-section in which it is contained by reference to the Contents page.
2. Examine the exploded drawing which constitutes the left hand page and identify the illustration number of the required part.
Note : In a few instances it may be available only as a part of an assembly.
3. Find the illustration number in the left hand column of the parts lists on the right hand pages
4. Establish the part number from the second column.
5. Verify the correctness of the part by reading the description in the third column.
6. Note the quantity from the fourth column.
7. Check the "Remarks" column for any other relevant information.

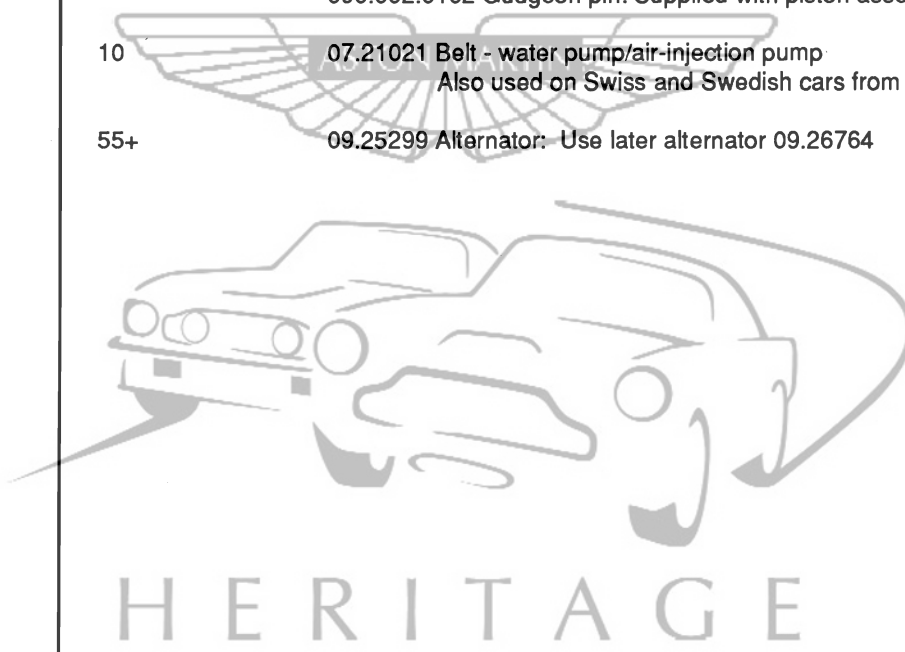

Example :

To find the part number of an oil drain plug :-

1. *Establish the section and sub-section : Section 1 - Engine, Sub-section 5 - Oil pump and sump*
2. *Identify the illustration number by referring to the exploded drawing : Illus. No. 13*
3. *Find the illustration number in the parts list and establish the part number : 691683*
4. *Verify the description : Oil drain plug, 1/2in. BSP, magnetic*
5. *Check the quantity : 2*
6. *Check the "Remarks" column : nil*

Page Number	Item Number	
1.1.1	1+	01.25839 Cylinder Block assembly, studded Also used on Swiss and Swedish cars from the end of 1988
1.2.1	3 5+	020.002.0127 Small end bush: use 02.26830 Small end bush 02.25649 Piston assembly: Also used on Swedish cars from the end of 1988
	6	080.002.0119 Gudgeon pin: Supplied with piston assemblies only 090.002.0102 Gudgeon pin: Supplied with piston assemblies only
1.4B.1	10	07.21021 Belt - water pump/air-injection pump Also used on Swiss and Swedish cars from the end of 1988
1.9B.2	55+	09.25299 Alternator: Use later alternator 09.26764
