

As part of our ongoing commitment to supply improved original parts, we are pleased to announce availability of a new kit to convert the engine mountings of manual steering DB5 and DB6 models to the DB6MK2 configuration.

The kit consists of;

- RH & LH Engine mounting brackets.
- RH & LH Chassis brackets.
- 2 Round metalastik mounting rubbers.
- 2 Rebound bump stop rubbers.
- The kit also includes all nuts, bolts and washers to fit.

Kit part number: 055-010-0200

This robust solution is particularly suitable for cars with uprated engines and replaces the original flat rubber mount.

A kit for cars with ZF Power Steering is under development and we will inform you when it becomes available.

To order these or any other Heritage parts please contact one of our Heritage Specialists or Main Dealers, details of which can be found by following the link on the News page.
