

2BA Throttle and Gear Linkage Ball Joints

Aston Martin Heritage Operations are pleased to announce the resource of the above Parts.

Fitted on all cars from DB4 to AMV8 in 1989, it is a critical component of the throttle and gear change linkage.

They have been machined from Stainless steel and polished to improve the appearance of this highly visible part.

I am sure you will agree that the quality and finish is far superior to the originals.

They can be ordered by quoting part number 125525 RH and 125526 LH, from any Heritage Specialist or Main Dealer whose details can be found on this News page.
