

We would like to remind all owners of the DB4, DB5 & DB6 that we are able to supply a modern replacement for the fuel pick up units. The kit consists of;

- Modern electrical control solenoid, remotely mounted.
- Machined alluminum adaptors and copper pick up tubes complete with brass mesh filter.
- Brass double ended pipe fittings.
- Individual kits for Saloon and Volante / Twin tank cars.
- Complete with full fitting instructions

34-27345 for Saloon

34-27346 for Volante / Twin tank

To order these or any other Heritage parts please contact one of our Heritage Specialists or Main Dealers, details of which can be found by following the link on the News page.
