

We are pleased to announce that the Lagonda Tool kit situated in the boot of all cars is now available from stock.

We have had to resource the correct Attache case used but now have an ongoing supply.

Some slight modifications to the layout and contents have had to be made mainly due to the increase in size of the First Aid kit. We have also deleted the cotton gloves and insulation tape. Bulbs and fuses have been added so the kit now covers all series of Lagonda.

The part number to quote is: 40-26143

To order these or any other Heritage parts please contact one of our Heritage Specialists or Main Dealers, details of which can be found by following the link on the News page.
