dmalloc	2.8.5	Public Domain http://sourcecommons.org/licenses/publicdomain/ http://ftp.cmc.ucsb.edu/pub/dmalloc/	Needed for implementing the Nance heap, as replacement for the vccom_ext_heap.dll sample library from Nance	Yes	Object Code	malloc-2.8.c, written by Doug Lea		Public Domain - CC0 (0) Universal - Statement of Purpose The laws of most jurisdictions throughout the world automatically confer exclusive Copyright and Related Rights (defined below) upon the creator and subsequent owner(s) (each and all, "Owner") of an original work of authorship and/or a database (each, a "Work"). Certain owners wish to permanently relinquish those rights to a Work for the purpose of contributing to a commons of creative, cultural and scientific works ("Commons") that the public can reliably and without fear of later claims of infringement build upon, modify, incorporate and other works, reuse and redistribute as freely as possible in any form whatsoever and for any purposes, including without limitation commercial purposes. These owners may contribute to the Commons to promote the ideal of a free culture and the further production of creative, cultural and scientific works, or to gain reputation or other distribution for their Work. For these and/or other purposes and motivations, and without any expectation of additional consideration or compensation, the person associating CC0 with a Work (the "Affirmer"), to the extent that he or she is an owner or creator of the Work, voluntarily agrees to apply CC0 to the Work and publicly declares the Work under its terms, with knowledge of the Copyright and Related Rights in the Work and of his or her ownership of those rights. 1. Copyright and Related Rights. A Work made available under CC0 may be protected by copyright and related or neighboring rights ("Copyright and Related Rights"). Copyright and Related Rights include, but are not limited to, the following: i. the right to reproduce, adapt, distribute, perform, display, communicate, and transmit a Work; ii. moral rights (where applicable); iii. publicity and privacy rights pertaining to a person's image or likeness depicted in a Work; iv. rights protecting against unfair competition in regards to a Work, subject to the limitations in paragraph 4a, below; v. rights protecting the extraction, dissemination, use and reuse of data in a Work; vi. database rights (such as those arising under article 17, paragraph 2 of the European Parliament and of the Council of 11 March 1996 on the legal protection of databases, and under any national implementation thereof), including any extended or successor provisions that apply; and vii. other similar, equivalent or corresponding rights throughout the world based on applicable law. 2. Redistribution. In order to exercise the above copyright and related rights, you must make available the following conditions and meet: a. Redistributions in any form must retain the above copyright notice, this list of conditions and the following disclaimer; b. Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution; c. Neither the name of the licensor nor the names of its contributors may be used to endorse or promote products derived from this software without specific prior written permission. 3. Limitation of Liability. Unless the individual copyright holder for a particular piece of software (a Contributor) has explicitly and independently agreed to provide additional terms of copyright or related rights, you must make available the following conditions: a. SQLite Library	3.8.1	http://www.sqlite.org/copyright.html Public Domain http://en.wikipedia.org/wiki/Public_Domain http://en.wikipedia.org/wiki/Public_Domain	Used for the SSP ASR internal resource database	Yes	Object Code	see http://www.sqlite.org/copyright.html		SQLite is in the Public Domain All of the code and documentation in SQLite has been dedicated to the public domain by the author. All code authors, and representatives of companies they work for, have signed affidavits dedicating their contributions to the public domain and originals of those signed affidavits are stored in a file in the main office of the author. Anyone is free to copy, modify, publish, use, compile, sell, or distribute the original SQLite code, either in source code form or as a compiled binary, for any purpose, commercial or non-commercial, and by any means. The previous paragraph applies to the deliverable code and documentation in SQLite - those parts of the SQLite library that you actually handle and ship with a larger application. Some scripts used as part of the build process (for example the "configure" scripts generated by automatically) might fall under other open-source licenses. Nothing from these build scripts ever reaches the final deliverable SQLite library, however, and so the licenses associated with those scripts should not be a factor in assessing your rights to copy and use the SQLite library. All of the deliverable code in SQLite has been written from scratch. No code has been taken from other projects or from the open internet. Every line of code can be traced back to its original author, and all of those authors have public domain dedications on file. So the SQLite code base is clean and is uncontaminated with licensed code from other projects.
Zlib	1.2.3	http://www.zlib.net/zlib_license.html	Used for resource compression	No	Object Code	Copyright (C) 1995-2005 Jean-loup Gailly and Mark Adler		This software is provided "as-is", without any express or implied warranty.
